

## Fanuc Robotics

**Architects: Gewers Kühn + Kühn, Berlin**

Fanuc Robotics Deutschland GmbH  
Bernhäuser Strasse 36  
Neuhausen (near Stuttgart)  
Germany

Year completed: 2005

Furniture:  
**invitation, mr. charm,  
flip flap, activation,  
time out**

The red **mr. charm** chairs in the large conference room can be seen from far away. Photos: © Graubner

In the various conference and meeting rooms, the invitation and activation table systems were used. Photos: © Graubner

An unusual and striking administration building was created by Berlin architects Gewehrs Kühn + Kühn for the Japanese robot manufacturer, Fanuc, at the Filder near Stuttgart. The combined metal and glass facade reflects the technical nature of the company. Inside, the numerous meeting rooms and open-plan office areas underline the company's philosophy, which is oriented to processes and communication.
